

Major Rubber Bollard

Our Major rubber verge marker is an ideal for open spaces or roadside verges and being made from 90% recycled tyre rubber, they offer an environmentally friendly alternative to a wooden or plastic verge marker.

They are reinforced with a galvanised steel insert, moulded in for a long life and added strength. They will not crack or snap off if accidentally knocked and are also resistant to both graffiti and vandalism.

They come complete with a pre-moulded concrete in snagging groove for secure fixing and can be supplied complete with hi-glow safety reflective band.

They are supplied in black as standard but can also be supplied in terracotta red and green.

Length 1000 long
 (700/500 AGL , 300/500 BGL)

Sections ● 150mm x 150 mm square
Available

Options ● Standard Root Fixed
